

A fluffy orange and white kitten is the central focus, sitting in a vibrant red knitted blanket. The kitten has large, expressive orange eyes and a white patch on its face. The background consists of various textured knitted fabrics in shades of grey, blue, and brown, creating a cozy, autumnal atmosphere.

COLOR MASTERBATCH TRENDS
FALL/WINTER 2021-2022

Embrace not just the winter blues, but all winter colors

AND THIS YEAR THEY DAZZLE US WITH THEIR PERKY SHADES

We all know the feeling of "winter tiredness", a state of slight exhaustion that prevails when this season approaches. Embracing the true and playful colors of winter can be easy though, if we follow a handful of tricks in our everyday lives that help us beat winter slump.

Spending time in sunlight. Exposing ourselves to sunlight can make us joyful, either by taking long walks during the day or letting the sunlight fill our home.

Getting a good night sleep. Feeling well-rested and vibrant surely helps us seize the day. Aiming for seven to nine hours of sleep at the same time every day can minimize winter exhaustion.

Regular exercise. Working out helps our body release endorphins, the "happy hormones" that boost our spirit.

Eating properly. A healthy, balanced diet full of fruit and vegetables and with minimum amount of sugar can truly affect our energy levels.

GLOBAL COLORS

offers these Color Vibes or any variations as masterbatches, suitable for a variety of applications (film, injection molding, blow molding, thermoforming, synthetic fibers, etc).

Global Colors colorists can develop these shades in different polymer carriers, depending on the end product requirements.

Each shade is expressed with a relevant Kritilen® color masterbatch.

Colors can appear different depending on the screen calibration.
