Living Coral

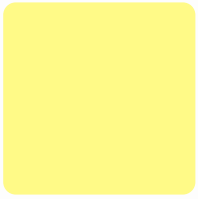

VIVID, ENGAGING, JOYFUL

Living Coral, the bright coral shade and color of the year 2019 according to PANTONE®, is inspired by many different aspects in nature. Coral is the color that prevails when diving in a coral reef, the enchanting color of the sunset and the color of one of the favorite fruits of summer, the peach.

Living coral is warm, familiar and at the same time playful and vibrant color, able to stand out in every demanding occasion and whenever something special is needed. It is eye-catching and excites the crowd. The bright coral shade is concurring the world, and may influence art, fashion, corporate branding, even technology.
